

WBT-122 A

WBT-122 A

Weld checker for resistance welders

- **Measures**
50Hz/60Hz AC welding current ,Single phase rectifier welding current DC inverter welding current, Capacitor stored energy welding current.
- **Maximum and minimum detection function**
If the detected value is below the pre-set one, the alert signal will be displayed. It is helpful to manage welding quality.
- **Simple operation with one button**
All the operations can be completed with one button.
- **Serial interface RS232**
All detected measures can be stored on a PC.
- **Small dimensions**
75x220x190 (WxDxH)
- **Power supply**
100~240V AC 50/60Hz
